

NLG NEWS

APRIL 13 – APRIL 17, 2020

In the past couple of weeks, we have been staying home because there are new **germs** in the air. **Germs** are things that can go from person to person and make them **sick**.

One of the best ways to not spread germs around is by washing our **hands** and keeping them **clean**. We wash our hands at a **sink**. A **sink** can be in a **bathroom** or a kitchen. The things we need to **wash** our **hands** are: **hot** water, **soap**, and a **towel**. We have to wash our hands when they are **dirty** so

we can stop the spread of **germs**.

The best way to wash our **hands** is by following these steps:

1. Go to the **bathroom** or the kitchen
2. Use the **sink** and turn on the **water**
3. Make sure the water is **hot** and not **cold!**
4. Use **soap** and spread on hands for at least 30 seconds.
5. Turn off the **water** and use a **towel** to dry off your **hands**.
6. Do this every time you use the **bathroom** or get your hands **dirty!**
7. Now your hands are **clean**.

Did you wash your hands today?
